

Also View Product extension for M2 allows your store to product suggestion sections. This

extension automatically monitors displays and tracks related products based on the actual

and real behavior of the customers with each item. Also view products will be displayed in

the frontend and you can customize it from the backend.

It displays related products in widgets for the Also View Product extension to

enhance user engagement and better shopping experience.

Open Cli in the Magento directory and follow the below commands

It automatically collects customer's purchase data.

Admin can customize product suggestion rules.
